Origins and Form

Wrecto Verso Haiku emerged from the fertile minds of cyclists who sought to explore the intersection of cycling and creativity. Inspired by the traditional Japanese haiku form, which consists of three unrhymed lines with a specific syllable count, Wrecto Verso Haiku takes a playful twist by using the "wrecto verso" technique.

In traditional printing, the "recto" side of a sheet of paper refers to the front, while the "verso" side refers to the back. Wrecto Verso Haiku embraces this

duality by printing the poem on both sides of the paper, creating a unique and interactive reading experience.

The form of Wrecto Verso Haiku follows the traditional haiku syllable count of 5-7-5, but it allows for a greater degree of flexibility and experimentation. The poems can be written in various languages and often incorporate elements of visual art, such as calligraphy or collage.
